

## muvis

Field strength, UV radiation and brightness (lux). All in one device.  
modular - digital - future-proof

### All advantages

- **3-in-1 solution** - magnetic field, UV & lux measurement in one device
- **Modular design** - measuring heads & options freely expandable
- **3D magnetic field measurement** - the full spectrum with just one 90° rotation
- **Acoustic support** - field strength recognizable by tone progression
- **Laser distance control** - guarantees reproducible measurement results for UV measurements
- **Calibration reminder** - automatic message on expiry
- **Data management** - storage of measurement results as CSV
- **Long battery life** - fast charging via USB-C interface
- **Robustness** - Protection class IP54

### muvis – the 3-in-1 solution for maximum safety:

Instead of three individual devices, a single system will suffice in future.

**muvis** combines magnetic field, UV and lux measurement, automatically saves all data and reminds you to calibrate in good time. The result: less effort, more reliability and seamless quality management.
